

Prince of Wales
PRIVATE HOSPITAL

**KNOWLEDGE
FOR LIFE**

**Baby and Child
CPR & First Aid class**

"After completing the course I felt empowered and prepared as a new parent if an emergency situation was to arise."

Much more than a First Aid class, we not only cover CPR and the most common First Aid topics that affect young children, but will also teach you how to prevent injury, recognise illness and when to seek help in a wide range of situations.

Our classes are taught by expert paediatric nurses who specialise in children's health and emergencies.
